The Spectronic MTM Internet Connectivity Client Module

The Spectronic MTM Internet Connectivity Client is a background software module taking care of dialling up an Internet service provider when a TCP-IP connection is needed by other Spectronic MTM Internet software applications.

Features

- Multiple e-mail accounts.
- Automatic set-up of an Internet account by SMS from the service provider.
- Can use norma dial-up or UDI (ISDN) dial-up for shorter log in time.

Supported Internet protocols

- PPP: HDLC, IPCP, CHAP, PAP, LCP and NCP.
- Transport Layer: UDP and TCP.
- Network layer: IP.
